Hi,

can someone tell me how big the new RTM SP3 for WinXP will be when it will be shipped and does the SP3 need SP2 before it can be installed on a system or can i even install it on a XP without any SP installed? What software prerequisites does it have except Windows XP and the requirements stated by microsoft on the technet of course? The misleading thing is that MS says, that it includes all updates and fixes for XP, but what does all mean here? All for XP available yet, or all for XP available from SP2 or even SP1?

TIA,...

Regards

Kerem
