Hi,

I've tried twice to install the Microsoft .NET Framework 2.0 Service Pack 1 (KB110806) (update 2 of 2) but it keeps failing.

The first update (1 of 2) installs fine, but about half way through the second update (listed above) the installation fails.

And because I am unable to install both of the updates, my USPS Shipping Assistant software will not work and I need it for my business.

Any help will be greatly appreciated.

Brightest Blessings,

Dawn
