Hi,

I have the very same problem and the error message is 2B08 in SQL 2005 Service Pack 2 just will not load.

Glad i am not alone on this, but don't know what else to do to fix it.

Thanks

Glen

Kind Attn: Windows Vista Business – Online Update Team,

Today I have tried to update my computer with your latest updates which arrived today. Most of the updates where installed successfully but there is a problem while installation of the Code 737D Error – Security Update for SQL Server 2005 Service Pack 2 (KB948109) update.

I have tried to install so many times but it fails to install every time.

Kindly fix the problem on the priority basis.

With Regards,
