Tip from a pro:

<http://msmvps.com/blogs/bradley/archive/2008/07/17/patching-this-month-sbs-2003-sp2-standard.aspx>

Or you could...

Start a free Windows Update support incident request:

<https://support.microsoft.com/oas/default.aspx?gprid=6527>

Support for Windows Update:

<http://support.microsoft.com/gp/wusupport>

For home users, no-charge support is available by calling 1-866-PCSAFETY in the United States and in Canada or by contacting your local Microsoft subsidiary. There is no-charge for support calls that are associated with security updates. When you call, clearly state that your problem is related to a Security Update and cite the update's KB number(s).

For more information about how to contact your local Microsoft subsidiary for security update support issues, visit the International Support Web site: <http://support.microsoft.com/common/international.aspx>

For enterprise customers, support for security updates is available through your usual support contacts.

I was trying to install this update to no avail. Error code returned is 2B08. I had try to search for KB on this error code but return no results. Now I cannot RAS in to my corpnet because of security violation for not installing this update. I am stuck. Any assistance you can offer is much appreciated.

Thank you!
