You can reserve more of less space for the object store. See FSRAMPERCENT in MSDN, and read this: <http://blogs.msdn.com/sloh/archive/2004/09/09/227599.aspx>

Also, please don't ask the same question multiple times in different newsgroups, again, read this: <http://guruce.com/blogpost/howtoaskquestionsonnewsgroups>

Good luck,

Michel Verhagen, eMVP

I need to increase the RAM space for my DOTNETCF based application which is running at the startup.

can i increase the RAM space without changing physical RAM?
