As I said I'm using DHCP so I don't need to set an ip address.  
Vmini.dll gets loaded and I added some debugoutput to my first post,  
may you have a look.  
But maybe the interesting stuff is that:

PPP: -AddAdapter:NdisOpenAdapter(VMINI1) failed with 0xC0010019  
and  
VMini:: Detected DHCP [DISCOVER]

Reinhold

.
