I am using the Lan91c111 driver from smsc website(https://www2.smsc.com/mkt/intforms.nsf/CWA_SRC-111-CENET-Source-Code) on my wince 4.1 system.

I found that the driver working fine with the project file which come with it. But when integrate it into my platform with a SOURCES file the built driver is not working and keep crashing the device.exe. It seems the ceddk lib did not link into the driver successfully. I use the following file: (I am building my own ceddk library).

SYNCHRONIZE_DRAIN=1

TARGETNAME=lan91c111
DEFFILE=lan91c111.def
TARGETDEFNAME=lan91c111
TARGETTYPE=DYNLINK
RELEASETYPE=PLATFORM

TARGETLIBS=\$(_COMMONSDKROOT)\lib\\$(_CPUINDPATH)\coredll.lib \
\$(_COMMONSDKROOT)\lib\\$(_CPUINDPATH)\ndis.lib \
\$(_COMMONOAKROOT)\lib\\$(_CPUINDPATH)\ceddk.lib
\$(_TARGETPLATROOT)\lib\\$(_CPUINDPATH)\ceddk.lib \
\$(_SYSGENOAKROOT)\lib\\$(_CPUINDPATH)\ceddk.lib

DLENTY=DriverEntry

INCLUDES= \$(_TARGETPLATROOT)\inc

SOURCES= LAN91C111_Filter.c \
LAN91C111_init.c \
LAN91C111_intr.c \
LAN91C111_miniport.c \
LAN91C111_ndis.c \
LAN91C111_phy.c

Is there any problem here, any hints?

Thanks
