Hi All,

I am trying to install the MS\_NDP protocol driver on the supporting desktop computer(windows 2000) and it is getting installed successfully too.

after running the command

```
tux -o -d perf_ndis -c "-ndisd -nounbind \Device\{<GUID>}"
```

i have noted the bind name of the network interface whose display name matches the device name displayed in Network Connections of Control Panel.

Display Name : Broadcom NetXtreme Gigabit Ethernet for hp

Bind Name : \Device\{B9AE70C0-1582-410F-931A-ACC7863A6323}

now when i run the command

```
tux -o -d perf_ndis -c
```

```
"-ndisd -nounbind\Device\{B9AE70C0-1582-410F-931A-ACC7863A6323}"
```

i get error with code 50 as mentioned below.

ShellProc(SPM\_LOAD\_DLL, ...) called

Command Line:

```

Unable to setup the desktop computer for NDIS performance test

can anyone tell me how to resolve this issue.

Thanks in advance,  
maiya
