Hi!

When i wanted to install cre-me vm to run jar files on wince 5,the cre-me exe didn't run. And after searching, i learned that i had to change proje.bib file to run binary files.And i have changed the proje.bib file like below:

MODULES

```
; Name Path Memory Type  
; -----  
creme.exe $_FLATRELEASEDIR\creme.exe NK SH
```

But after rebuilding I get te error below:

```
Error: Could not find file 'C:\WINCE500\PBWorkspaces\osimg\RelDir\VIABSP_x86_Release\creme.exe' on  
disk  
creme.exe C:\WINCE500\PBWorkspaces\osimg\RelDir\VIABSP_x86_Release\creme.exe NK SH
```

Why?And what is the solution?

Thanks and regards...
