..do is Java and is not supported out-of-the-box by CE. There are JVM's for Windows CE available, just search this newsgroup (read how here: <http://guruce.com/blogpost/howtoaskquestionsonnewsgroups>) or the web.

..aspx is ASP.NET and that is not supported on CE, see also <http://blogs.msdn.com/cenet/archive/2006/08/23/715468.aspx>

Good luck,

Michel Verhagen, eMVP

Hi All,

When I build the Internet Explorer into my WinCE platform , I can open website and explorer the internet , but some website that I can't open , it show ".do" file need to open ,but I have no idea what to do .

And ".aspx" webpage also can not be open , what component I miss ? thank you for your comment and help!

Best regards,
Calvin
