Hi!

I have a Compaq Presario 1244 laptop with Windows 98. Also on it is Office 97 Professional. Since I bought the laptop used, this software was already on it -- though I would like to get rid of it and use my own software. However, when I attempt to uninstall the Office97 Pro, I get a dialog box that asks me to insert the Office 97 Pro disk 1 into the CD drive....even though I don't have the disks (remember the software came with the computer when I bought it used). I own Office 97 Small Business and would like to use that...but I can't uninstall the 97 Pro.

The only reason (besides wanting to be legit with software) to uninstall and reinstall office is because when I work with Word and attempt any task such as Page Setup or Print Preview or Save As, I get an error that tells me "Insuffient memory to complete talk. Please close other windows and retry." The only option is to click OK. Incidentally, the only way I can save a file in Word is to save it as a Rescued File...which gets really annoying!

Please help!

Sheila
