Searching via Google using the string "propres.dll" is not a very good idea and the reason you are getting pages in languages other than english (like french) is that "propres" is actually a word in French (which I believe means "clean"). So, the results that have the string "propres dll" have nothing to do with this problem.

I do agree that installing and uninstalling does not work.

Thank you very much anyway.

Anybody else have a clue?!?! HELP! PLEASE!

Sincerely

Jorge Sosa LÃ³pez
