Hi to all,

I'm using the Office Student and Teacher Edition 2003. However, when I'm viewing my schoolwork on Word, some symbols do not come out correctly. For example, the "proportional" symbols turns out to be a camera. I tried to solve the problem, the the Office Installer said that the programme does not have the file SKU112.CAB. When I explored my installation disc, the SKU112.CAB file was there. I am totally lost about what to do to solve my problem. Any one can help me out with this?

.
