I have installed it locally but it still seems to crash.  
In fact when I tried to load it remotely it couldnt seem to find the inf files on my cd so I had to install all the files locally. Its a scanner, fax, OCR as well. I really didnt want these features added to my system but it added them all anyway.  
Any other information that may help. Perhaps somehow its still looking on the remote computer despite the fact that the drives are loaded locally??

Thanks.

.
