This may be the same problem reported by J.C. Johnson. Has Windows Update recently installed any new updates unattended?

Hi,
Since last few days we are receiving issues from 5 global offices that one or another Word 2007 files are getting corrupted and unable to

recover

it. We already scanned for spyware as well for any virus but no luck. Gone through the KB listed in 918429 but still no luck. This problem has

occured

to all who are using Office 2007. Is there any critical flaw or vulnerabilities discovered in MS word 2007, should we stop using word

2007,

PLease guide as this would be a serious issue of losing word files that

are

unrepairable.

Best Regards,
