What operating system are you using? If Windows NT then you might be encountering a bug that was corrected in a service pack:

<http://support.microsoft.com/kb/122368/EN-US/>

If this is the issue you are encountering then this might be the download you need:

<http://support.microsoft.com/kb/128465>

I've purchased a new HP printer. It works fine in all apps except when printing from Word 6. I receive the error "There is insufficient memory. close extra windows and save you work." There's over 76gigs of free space on the hard drive, so what is the problem????

Thanks in advance
