What I mean by this is if I have a section of text like the following:

.
. .

The theory of genetic programs and their applications are described in detail in reference [5].

.
. .

References

[1]

[2]

.
. .

[5] Koza, Genetic Programming, Publisher name, year, so on

[6]

If I add intermediate references so that reference [5] becomes reference

[12], I would like there to be automatic updating so that the line in the

references becomes

References

[1]

[2]

.
. .

[12] Koza, Genetic Programming, Publisher name, year, so on

[13]

microsoft.public.word.docmanagement: Automatic Updating References in MS Word

without me chanGing it. I would like to invoke a similar feature for referencing equations, sections, figures, and tables in papers.
