I was attempting to add a word to the dictionary. After all my attempts I ended up with text that appears at the beginning of each new document. It's like there is an automatic header. Here is the text I am getting "Can cna cna crs can cna ". This is also appearing on every new email messages as well as new documents (Word is my editor). I checked autoformat and can't find it anywhere. I really don't need to add the CNA to my dictionary, but would like to remove the trash that is automatically appearing on each new document. I can delete the text and then everything is okay for that document, but it appears at the next new document.
