Hi Haitham

I assume that your file contains pictures or objects like Excel graphs or Visio diagrams, and that this is causing the large file size. The "disk is full" message may be an indication of corruption rather than too big a file.

I would do the following:

1. Make a safe backup copy of your document so you can return to it if necessary.

2. Go through Suzanne Barnhill's list for checking on the causes of large file sizes, for example at

http://groups-beta.google.com/group/microsoft.public.word.application.errors/browse_frm/thread/fe07e975d8cf7dc8/0

3. Follow the instructions for examining and correcting corruption in a Word document at

How can I recover a corrupt document or template – and why did it become corrupt?

<http://www.mvps.org/word/FAQs/AppErrors/CorruptDoc.htm>

Hope this helps.
