Thank you.

It works.

I cant believe I didn't try the paste from the menu also ctrl + v works.

Old habits I suppose.

I've always liked the RC method because it is simple.

The concerns were because I can still use the RC method at college but not at home.

Also when I tried to copy some help files into Word the I got the same problem, so I just assumed I had made some bad changes to my setup or graphics problems.

Again thank you for your time.

Regards.
