Zipped files are not lost.
Ask your boyfriend, if he still is your boyfriend.

Word does not download from a disk; it may install from one. Your boyfriend's first job is to reinstall Word. Then move the documents from the zip folder into your My Documents folder.

My boyfriend reformatted my operating system – I know, I know. Anyway, now Word will not download from the disc I have and all of my Word files are lost in the Zipped folder he backed up from old system. Any ideas on how to get it to download and find the file path OR how to retrieve my lost, zipped files?

Whitney
