Have you checked the Table Menu to see if Gridlines are shown/hidden?

When I open a new label document in word, the light grey outline of the labels does not show up. Even when a label doc is sent from another computer with the outlines showing, it won't show up on my computer. I know this has to be simple, but I can't figure it out. I called the "help desk" and my version of Office XP is no longer supported.
