I believe the name of the reviewer is picked up from the document properties. If you clear the name here it won't display (In my Word 2002 XP File/Properties/[%look for Author%]).

Hi,

I need to insert a comment into a document, however I do not want to show any author information. It's not desired for this particular project.

What I need is: Comment: abcd
Not Comment[rpb1]: abcd

Thanks
Ray
