When I shift from Print View to Draft View in a document the headers doesn't show. I can make a header pane appear using:

```
Sub Test()  
ActiveDocument.Sections(1).Headers(wdHeaderFooterPrimary).Range.Select  
End Sub
```

This opens a pane at the bottom of the view with the header contents. This pane has an "X" to close it in the top right corner.

Is there a UI command somewhere that will toggle the header pane open and closed?

Thanks.
