Generally, you can use the macro at http://www.gmajor.com/installing_macro.htm to update fields in all stories (headers, footers, text boxes, and so on). However, this does not seem to work (reliably) for fields in footnotes. You may want to ask in a programming newsgroup such as microsoft.public.word.vba.general for assistance with this.

Word 2003

I have the following two sets of code but neither updates fields that are placed in my footnotes. What code do I need to get the footnotes updated?

```
Selection.WholeStory  
Selection.Fields.Update
```

```
ActiveDocument.Fields.Update
```
