I'm seeing the same light dotted line in Word 2007 that I saw in Word 2003 and earlier. Perhaps you have selected something else instead?

This prompted me to seek out the checkbox in 2007, and it turns out  
the text boundaries are a rather assertive dark blue line. Is there  
any way to change it to the light dashed or dotted line it was in  
2003?

Are you describing text boundaries (a dotted line around the document body  
area indicating the margins)? You can toggle those on and off in Tools |  
Options | View. That is also the place to toggle display of the vertical  
scroll bar.

I've been having problems with lines on my screen when I write in print  
layout view, which I have always done. There is no vertical scroll bar,

Re: Problems with page set up

nor  
are there any vertical margins, so I have to go into page setup in file  
if  
I  
want to change them. Mytextfits into the box that is on the page, and I  
cannot see how to get rid of it. It has been like this for about 3 weeks  
and  
I don't know what to do! Can someone help? There aren't any lines if I  
write  
in normal view, but there are still no margins or scroll bar. Anyone  
know  
what to do?  
Thanks!-
