I'm using Word 2007 --- how do I display text boundaries?

"Suzanne S. Barnhill" wrote:

If you have text boundaries displayed, you'll see the outlines of the text boxes or frames. Text boxes (when selected) have round white sizing handles; frames have square black ones.

I do alot of scanning textbooks and I must produce electronic documents free of hidden text boxes and frames. Randomly left clicking around each page brings up hidden boxes and frames but there has to be a more efficient way of knowing if and where these are in a document.
