I have no idea if I am in the right place for this!

When i create a web page in word and insert or create any graphics, I cannot display on the web as the page contains ActiveX functions.

Our server does not permit ActiveX

I have no idea how/why and documents I create contain any ActiveX when all i am doing is inserting a bmp, jpeg or gif or simply a text box!

I have searched my pc and have no activex anywhere on it. can anyone help me?

Andrew
