Word will remember the last−used folder provided you do not have any location specified for clip art on the File Locations tab of Tools | Options. If you do have a folder specified, there is no way to delete it (leave it blank) through that dialog. You must instead edit the Registry.

The relevant Registry key is HKEY_CURRENT_USER\Software\Microsoft\Office\11.0\Word\Options\PICTURE−PATH. Delete this key to restore the behavior you remember.
