Objects may well not exceed one page, but why then r the page numbers keep increasing in the status bar? It goes on increasing till I stop by someway, for example by pressing esc key. Is this a bug?

Let me give a clearer way to recreate this issue, as this only happens with merged cells.

### Scenario 1

Insert a picture into a doc and try to enlarge it by dragging it beyond the page border. Size of the pic enlarges till it reaches the page size.

### Scenario 2

Insert a table (3 rows,2 cols), merge the left most cols of two rows. Insert a picture into that cell, and as before try to enlarge it by dragging it beyond the page border. Insert a picture into a doc and try to enlarge it by dragging it beyond the page border. Page numbers keeps increasing in the status bar.

Thanx in advance

An object cannot exceed one page in size.

Insert a table with multiple rows in to a document and merge two or more rows vertical cells . insert a picture into that cell and enlarge the pic

by

dragging it to the next page and release it. page numbers will keep on increasing on the status bar. is there any way to stop this from

happening..

?

Thanx in Advance!
