Hi Terry,

You did not say which operating system you are on, but start with reading:

<http://www.microsoft.com/resources/documentation/Windows/XP/all/reskit/en-us/Default.asp?url=/resources/docume>

You could also go to [www.microsoft.com](http://www.microsoft.com) and type "file names" into the search box. Some of the results are extraneous but should give you a starting point. Below is the address for the above search results:

<http://search.microsoft.com/search/results.aspx?st=b&na=88&View=en-us&qu=%22file+Names%22>
