

Get Reading view in page width zoom

Source: <http://www.tech-archive.net/Archive/Word/microsoft.public.word.pagelayout/2005-02/0921.html>

I use Word 03 with SP1 on a laptop with a 14" screen with XP Pro. I would like to use reading view more often but it always shrinks down to "whole page" view and wastes 3" of screen to the right and the left of my doc. I want to be able to use it in "Page Width" or even better "Text Width" zoom but help files don't say how. Even if I increase text size it just displays fewer words in same space. I notice the zoom pull down disappears in reading view when switching from normal view. It makes no difference if I do two pages side by side or just one. The one is the same tiny size as a two page view, just centered on screen

Thanks.
