The first thing I would suspect is that you need to update your printer driver – especially so if you're running 2007 on Vista.

Hi All,

I was hoping someone would be kind enough to help me around an issue I am currently facing with Word 2007...

I have a multiple page document, to which I have added page numbers – all appears fine at this point. However, when I go to print preview the page numbers disappear (they also don't appear when printing the document)!?! :(

Any advice would be greatly received and appreciated.

Many thanks
