Modify the style to include the "Do not check spelling or grammar" property (in earlier versions, you'd do this through Format | Language in the Modify Style dialog). If you also set the style to some language other than the one assigned to your .acl (AutoCorrect) file, presumably AutoCorrect won't work, either.

In Word 2007, how do I stop autocorrecting or spell checking for a specific

style only?

Thanks.

Greg Reese
