The button is there, but isn't active unless you have more than one section (created by inserting section breaks) and your cursor is in the second or subsequent section.

Mark wrote:

All of the suggestions require a button on the header/footer tool bar that says "same as previous". I have no such button. I am using Word 2003. Every time I change a portion of a header, it changes on a number of pages. I want separate headers for each page.
