I recently got a copy of a book I wrote from a POD that had my Word doc using Times New Roman 12. The printed book is 9" by 6" I didn't upload my file as a pdf (which I can do) but as a doc file. The fonts look very small and the top margin is large. How can I remedy this without having to change the 12 point size and need to reformat the whole doc by hand?

I'm using 1 inch margins in Word. But it seems to print to a 6 x 9 format I will need to change the width. What are the suggestions for this?

Incidentally, I did upload the same book as a pdf after this and got 8 x 11 books back from the POD, so this won't solve the problem.
