See these two articles:

<http://www.word.mvps.org/FAQs/TblsFldsFms/KeepTableOn1Page.htm>

<http://www.word.mvps.org/FAQs/TblsFldsFms/ControlPgBrksInTables.htm>

The operations are the same in Word 2007; the only difference is how you get to the Table Properties dialog — when the cursor is in a table, click on the Table Tools > Layout tab and then click the Properties button at the left end.
