Hi,

I'd be very grateful for help with the following.

I have a text file open in Word. I need an example of how to use a regular expression to search for ranges of text that begin with '\begin{figure}' and end with '\end{figure}' inclusive.

\begin{figure}

Any text can go here etc etc etc

\end{figure}

Once this is found, I would like to convert it to a Word Range object and then continue the regular expression search from the next point in the document.

Thanks in advance,

Enda

.
