You've fallen into a trap that gets about a dozen posters a year. There are two lines in that macro that end with an underscore, which is a "line continuation character" to tell VBA that the next line is part of the same statement. But the underscore **MUST** be preceded by a space, which you have left out.

See <http://www.word.mvps.org/FAQs/MacrosVBA/ AtEndOfLine.htm>.

If you had simply copied and pasted the macro, you wouldn't have had that problem, but the space is small in that font and easy to miss when you're retyping the code.

Hi Doug – I have worked my way through
<http://word.mvps.org/FAQs/Userforms/CreateAUserForm.htm>
and the steps all made a lot of sense (thanks).

When I tested it, however, I got the following prompt error: "Compile error: Method or data member not found" and when I cick 'ok' Private Sub CommandButton1_Click() is highlighted in yellow and the cursor is at the word 'Range' .Bookmarks("Text1").Range_

What have I done wrong?

You have a little bit of learning to do.

See the article "How to create a Userform" at:

<http://word.mvps.org/FAQs/Userforms/CreateAUserForm.htm>

Re: Macro that generates a prompt box(?) that once selected insert
and then the following page of fellow MVP Greg Maxey's website

http://gregmaxey.mvps.org/Populate_UserForm_ListBox.htm

I would be sincerely grateful for any assistance with the
following. I have
limited macro recording experience and no experience with
Visual Basic,
but
would like to know if (with my lack of experience) the
following is
something
I could achieve. I am extremely keen to try and learn.

I would like to set up a macro that runs when a toolbar button
is clicked
that achieves the following:

1. A prompt box (?) comes up in the style of a form.
2. The form has a pull-down list of four cities.
3. Depending on which city is selected, a list of companies
appears
underneath.
4. Next to each company is a button or box that can be
selected.
5. Once the user selects the companies they want, the user
clicks on a
button at the end of the prompt box that says 'Insert'.
6. The selected companies are then inserted into a table in the
Word
document.

I know it is a big ask, but if anyone would be kind enough to
step me
through how I could go about this, I would be extremely
grateful.
