I'd like to send the document AS the email – instead of attaching it.....any ideas ?

Ultimately I'd like a drop down in the document with a list of departments – when the user selects a department – it refers to a look-up in the code and selects the appropriate email address (only 8 or so email addresses).

Out anti-spam is also quarantining the sent email.....as it has a base64.txt attachment ?

Chris

Now it does nothing at all...any other suggestions?

can I email you the document?

Thnx

Macro stops at this line
indicating error

```
Dim oOutlookApp As  
Outlook.Application
```

" Compile error: User
defined type item not
defined"

I have this attached to a
submit button as an on click
function

"Graham Mayor" wrote:

If you are
using
Outlook
you can use
something
like the
following

```
Sub  
SendDocumentAsAttachment()  
Dim  
bStarted As  
Boolean  
Dim  
oOutlookApp
```

Re: Add recipient email to 'ActiveDocument.SendMail'

```
As
Outlook.Application
Dim oItem
As
Outlook.MailItem
On Error
Resume
Next
If
Len(ActiveDocument.Path)
= 0 Then
'Document
has not been
saved
ActiveDocument.Save
'so save it
End If
'see if
Outlook is
running and
if so turn
your
attention
there
Set
oOutlookApp
=
GetObject(,
"Outlook.Application")
If Err <> 0
Then
'Outlook
isn't running
'So fire it up
Set
oOutlookApp
=
CreateObject("Outlook.Application")
bStarted =
True
End If
'Open a new
e-mail
message
Set oItem =
oOutlookApp.CreateItem(olMailItem)
With oItem
'and add the
detail to it
.To =
someone@xxxxxxxxxxxxxx
```

Re: Add recipient email to 'ActiveDocument.SendMail'

```
'send to this
address
.Subject =
"New
subject"
"This is the
message
subject
.Body =
"See
attached
document" '
This is the
message
body text
.Attachments.Add
Source:=ActiveDocument.FullName,
Type:=olByValue
.Send
*****
'If you want
to view the
message
before it
goes
'change the
line above
from .Send
to .Display
'Otherwise
the message
is sent
straight to
the Outbox
'and if you
have
Outlook set
to send mail
immediately,
'it will
simply be
Sent
'with no
obvious
sign that
Outlook has
operated.
'Apart from
the copy in
the Outlook
Sent folder
```

Re: Add recipient email to 'ActiveDocument.SendMail'

```
End With
If bStarted
Then 'If the
macro
started
Outlook,
stop it
again.
oOutlookApp.Quit
End If
'Clean up
Set oItem =
Nothing
Set
oOutlookApp
= Nothing
End Sub
```

Have
added
the
function
to
a
command

Re: Add recipient email to 'ActiveDocument.SendMail'

button,
but
want
to
have
it
send
to
a
specific
email
address

Thanks!
